JOB PREFERENCES

Front-end Development Shenzhen

EDUCATION

2014.9-2018.6 **Hubei University of Science and Technology** **Internet of Things Engineering**

SKILLS

- Familiar with HTML5/CSS3, page layout, positioning, BFC, etc.
- Familiar with JavaScript data types, scope, closures, prototype chain, inheritance, DOM/BOM manipulation, Ajax, event mechanism, ES6+ features, modular programming, etc.
- Familiar with TCP/IP, HTTP/HTTPS, cross-domain, security, performance optimization, etc.
- Familiar with front-end frameworks such as jQuery, React, Next, etc.
- Use UI libraries like AntDesign, ECharts, etc.
- Use engineering technologies such as Webpack, Git, Nginx, Docker, CI/CD, etc.
- Use open-source frameworks like Docusaurus, Hugo, WordPress to build blogs, documentation, and official websites.
- Use technologies related to Python, Scrapy, Java, MySQL.

WORK EXPERIENCE

2023.11-2024.11 **Zhongtong Wenbo Company** **Alibaba Cloud Infrastructure Architecture Department - Web Frontend**

Next.js | Ant Design | Docusaurus

2021.2-2023.9 **Tengyu Interactive Company** **Tencent Platform and Content Group - Web Frontend**

React

2018.3-2020.12 **Augmentum Company** **Research and Development Department - Web Frontend**

React | Ant Design | Ant Design Mobile

PROJECT EXPERIENCE

2023.11-2024.11 **Kunlun Platform**

Project Background: The project involves AI inference algorithms for servers under different application scenarios and configurations, including metrics such as Throughput, QPS, and Latency.

Project Responsibilities: Independent front-end development, solution design, and review.
• Built the front-end framework using Next.js + Ant Design.
• Conducted requirement confirmation meetings with Product and Algorithm teams to discuss the business logic and interface parameters of each functional module.
• Designed the front-end UI interface and communicated with Product to confirm details.
• Implemented the layout and development of various modules, and conducted local mock development based on the interface documentation, facilitating interface integration work.
• Deployed tests in the testing environment and handled bug fixes.

Technology Stack: Next.js + Ant Design

Project Achievements:
• Completed the page development and integration of all modules.
• Maintained common components.
Others:
• Responsible for the design and development of the official website and documentation repository.

2021.2-2023.9 **Tencent Document Privatization CRM**

Project Background: A management system provided for Tencent Document's privatization clients, including modules for personalized management, resignation document management, capacity management, and more.

Project Responsibilities: Independent front-end development, solution design, and review.
• Built the front-end framework using React and an internal UI library.
• Held requirement confirmation meetings with product, back-end, and UI teams to discuss the business logic and design of each module.
• Met with the back-end team to confirm the specifications of all interface fields and the schedule for joint debugging.
• Implemented the layout and development of pages and components for each module according to Figma design drafts, and conducted local development using mock data based on interface documentation.
• Confirmed the upstream and downstream interfaces involved and facilitated the joint debugging work for the interfaces.
• Completed deployment testing in the testing environment and bug fixing.

Technology Stack: React, Tencent internal UI library

Project Achievements:
• Completed the page development and joint debugging for all modules.
• Maintained common components.
• Organized relevant internal documentation.

2018.3-2020.12 **Bank CRM**

Project Background: A comprehensive CRM solution specifically designed for banks and enterprises, providing a series of functions such as institution management, customer management, and WeChat public account management.

Project Responsibilities: Core front-end development of the project

- Responsible for the development and bug fixing of daily business modules.
- Addressed performance issues in large data list scenarios by implementing a virtual list solution.
- Developed a lottery activity component.

Technology Stack: React, Redux, React-Router, Ant Design, Ant Design Mobile

Project Achievements:

- Responsible for the development and maintenance of several core modules, including institution management, QR code management, and content publishing management.

Others:

- Maintained the WeChat H5 mall, responsible for the development of product pages and others.
- Responsible for the development of pages for the Mid-Autumn Festival WeChat lottery activity.
